About This Game

You are the manager : Whether it's tactics, contracts, sponsors or stadium upgrades — determine the future and the success of your club, but don't neglect your private life!

By fans, for fans : Club Manager is developed by fans with more than 20 years of experience and a passion for football.

Editor on board : With the integrated editor, you can create your own teams or edit teams, players and club names that are included with the game.

Lead your team to victory with the right tactics:

- **Getting started** : Launch your career in the German league or one of four international leagues!
- **Strategy** : Comprehensive contract, training and line-up systems for your players and team.

-
- **Finances** : Make decisions concerning player contracts, ticket sales, sponsors and merchandising.
 - **Development** : Expand your domain from a simple Sunday league football ground to a fully equipped stadium, including the relevant infrastructure.
 - **Excitement**: Intervene directly in play and make tactical decisions in real time.
 - **Tactics** : Whether it's parking the bus or throwing everything forward — you decide which strategy to play and for the first time can create an individual training plan for each player.
 - **Transfer market** : Buy and sell players under realistic conditions, with the new renegotiation option!
 - **Goals** : As the manager, you will need to strive to meet the board's objectives for the season.
 - **Tournaments** : Create your own tournaments or host friendlies.
 - **Statistics** : Comprehensive statistics will help you climb to the top of the league.
 - **Budding new talent** : Train and foster youth players for your future success.
 - **Back-room staff** : Manage your entire team of training staff and delegate tasks.

Features

Classic football manager with an eye for the essentials

- Club Manager has everything that a good football manager needs: whether it's tactics, statistics, a transfer market, stadium upgrades, advertising, merchandising, developing the stadium periphery, fostering youth talent, training sessions or training camps — for the first time now also in France and Italy!
- **Comprehensive league system** : The German league and four international leagues, including numerous championships in almost 200 countries.
- **Powerful editor**: Comprehensive customisation options which also allow you to modify player and club names, including kits.
- **By fans, for fans**: Club Manager is developed by fans with more than 20 years of experience and a passion for football.
- **Merchandising** : Purchases can now be made throughout the entire season.
- **Kit Designer** : There are now 20 designs available. The colour of each club's shorts and socks can now be selected individually.

With this current release, i have dissappointed point at basic needs of my personal configuration setting. How can a player cannot customized controller setting, many of player need to bind right thumb stick on controller to accelerate and front brake. Please fix this.. Ha,ha. Had spent aroud one hour endlessly shooting. Well done. It's not to late to kill some zombie. Going to play with my mates.. Bought it during the sale. But then figured out, that there is no sense to buy it at all! As there is A.R.E.S. Extinction Agenda EX - enhanced and updated version of A.R.E.S. without possibility to update Agenda to Agenda EX. So DON'T buy THIS version of game - it's USELESS! Proceed to EX version directly, instead.

[all these russians can **** my Solid naval war platform constantly updated. Developers listen to players and constant patches make this a definate buy for any Strategy player. pretty fun. a must own. really good for getting into VR. good for getting aggression out or breaking stuff in your house.](#)

I am giving this a tentative recommendation, which I hope to be a complete one as it updates. I played the freeware version and fell deeply in love with the sprite animation, and location, but abhorred the controls. The controls thankfully were something I got used to but having the option to map out own controls would be a great option.

All in all, for being early access, I think it works pretty well and has a great deal of promise. I, personally have yet to encounter any game breaking bugs and I look forward to future updates.. Pretty intense experience. Really hate those zombies. Density is good. Music is great. The main character is awesome as hell.

They should definitely add more levels.. fun, no population to play multiplayer unless you have friends though.. If you want slow, tactical game then this game is not for you, neither for me.

You are going to get quick scoped all day long. Enemies can flank you in a matter of second. In fact there is not much of a tactical play here, one player can own all enemy team.

Me, personally I don't like it. The game paced is way to fast.

However game runs well, there is enough content so I'm going to leave a positive feedback.. Good Premise, mediocre execution. Having not played a point-and-click since Titanic, over 14 years ago, I thought I'd try this as the WW2 spy theme seemed interesting. Sadly, it proved nearly unplayable. Someone experienced with this sort of game may do fine, but I struggled to figure out what I was supposed to do and eventually gave up. You have to do so many boring tasks to get something simple done, as if they tried to prevent the game from being too short, instead of making a better longer game. Example (MINOR SPOILERS): struggle to set up spy camera with correct lens (no instructions given), tripod too low for view out of window (seriously?), go back to office and search for taller tripod, try camera again only to find steam from leaky pipe in nearby building blocking view, find someone to fix pipe...take photo...develop photo (no instructions given), give photos to your boss who does not accept them because you apparently had to take more photos (this was never made clear). The game is full of this, tedious and not enough guidance or help. The voice acting is very mediocre (why get sleepy americans to do german voices?). There were also some problems with screen resolution and loading crashes. All in all a pity, as this game clearly had some potential, with great and historically authentic looking visuals. If you like the subject material and have a lot of experience with these sorts of games, you may like it, otherwise, give this a miss as there are probably much better point-and-click games out there.. It looks like a shmup, but honestly this game has more in common with Doom than anything else. This isn't a bad thing, though. The gameplay's simple, but fun.

One thing unique to the game is that in order to keep a weapon acquired in a level, you have to beat that level without dying after you get the weapon. This adds a nice challenge while still keeping the game easy enough to beat if you're not looking to get everything.

Anyway, get it.. good game superior controls and outstanding physics. This helps a lot with the NG+ runs and ending hunting, but I would recommend against it for your first playthrough *_*. A classic & an amazing audio/visual experience. Have played it to death on dreamcast and still purchased it! Shivers when I played through it again in high rez!

Lots of stuff to unlock and the new mode makes me want to buy a new gfx card and vr headset.
